

Dermatology Clinic

402-232-2273, ext. 3433 or 294-3469

Dermatology services are available by PCM referral.

Initial shaving waivers must be referred by the PCM, but waiver renewals are available after contacting the clinic for walk-in availability.

Some procedures and services provided by the dermatology clinic are considered elective, semi-elective, or cosmetic and are done only on a space-available basis. The need for appointment availability to provide dermatologic care for medically-necessary and medically-indicated treatments and care will take precedence over appointment availability for elective or cosmetic procedures. Accordingly, there is no guarantee that elective or cosmetic services will be available at any given time, or that they will continue to be available in the future even if a patient has had access to them in the past. All of these types of procedures will be booked only by the dermatology clinic at the discretion of the dermatologist based on availability of time, resources, type of service being requested, UHC policy, and other relevant factors.
